

AMERICANA®

Foam Encased Coils

Provide durable edge support and increase sleep surface

Superior Convoluted Foam

Provides plush surface for a superior, comfortable sleep

Visco Lumbar Support® (VLS)

The patented VLS feature provides body conforming support for those who need additional cushioning to reduce back pain. The dual advantage of VLS makes it a vital ingredient in mattresses. It is a high quality visco memory foam layer placed in the center of a mattress, side to side to give total lumbar support.

Eco-Comfort®

The Eco-Comfort® Initiative ensures that our production procedures meet stringent environmental protection standards.

Our Springs - Patented Ameri-Spring®, Ameri-Guard® and PowerStack® coils are not treated with any oils or chemicals.

Our Foam - Our mattresses are manufactured using foam produced by Natural Foam Technology™ (NFT), which utilizes naturally occurring CO₂, a substance exhaled by animals and used by plants. This foam is bio-based, fully recyclable and made without the use of CFC's. Currently, there's not a more natural way to produce foam.

Our Ticking - We use Bamboo®, CoolMax® and Aloe-Vera treated mattress ticking which is 100% biological, and its production process is free from substances that could damage the environment.

Lady Americana's commitment is to leave the smallest environmental footprint as possible. All of our waste is recycled.

*All models use the [Zero-Flex Box](#). Total support for the mattress comes from the box that is guaranteed for support during the entire life of the mattress.

**Warranties vary regionally. Please contact your Retail Outlet for details. Visit the Dealer Locator to find the closest retailer near you.
